

You won't ever be  
100% safe

accept it and...

Embrace it.

But...

Fear is a feeling

Learn to control it.

Security is just a  
perception

don't relay on it.

Make sure you  
understand the context of  
where you are

also...

# Security by obscurity

It isn't your friend...

# Proactive Security

The best defence is a good offense

They are going to  
track you

use it in your advantage...

Let all your friends,  
publicly, know where you  
are

Live an open life...

That'll FREE you from the  
thought of being followed

... 'cause they already know. And...

It will help you plan and  
be prepared if they get  
you

'cause they are going to get you... But

People will know, people  
will help you and look out  
for you

And, also...

You need to help people,  
look out for them... And  
learn to trust them

... in at least a way.

Develop a trusted  
network of people like  
you.

It might become critical in some environments.

Be open, be free and  
be safe!

Thank you
